

Mueller Electric's clips use springs made of the finest materials, wound to the highest tolerances for strength and holding power. Each clip we carry is made of solid copper and paired with a flexible black (BLK) or red (RED) vinyl insulator.

### Miniature Alligator Clip

- 5 AMP capacity
- Full meshing teeth
- Solder or crimp connection
- Jaws open 3/16" max

**Part Number 30C-RED**  
For clip with red insulator  
**Part Number 30C-BLK**  
For clip with black insulator

### Alligator Clip with screw

- 10 AMP capacity
- Screw connection eliminates soldering or crimping
- Jaws open 5/16" max

**Part Number 60CS-RED**  
For clip with red insulator  
**Part Number 60CS-BLK**  
For clip with black insulator

### Crocodile Clip

- 10 AMP capacity
- Nested teeth contacts entire length of jaw
- Crimp or screw connection
- Jaws open 5/16" max

**Part Number 85C-RED**  
For clip with red insulator  
**Part Number 85C-BLK**  
For clip with black insulator

### Pee-Wee Clip

- 10 AMP capacity
- Jaws mesh tight, interlocking necks prevent offset
- Crimp or screw connection
- Jaws open 5/16" max

**Part Number 45C-RED**  
For clip with red insulator  
**Part Number 45C-BLK**  
For clip with black insulator

### Automotive Analyzer Clip

- 20 AMP capacity
- Teeth mesh on 3 sides of jaw
- Crimp or screw connection
- Jaws open 1/2" max

**Part Number 48C-RED**  
For clip with red insulator  
**Part Number 48C-BLK**  
For clip with black insulator

### Automotive Clip

- 75 AMP capacity
- Teeth mesh on 3 sides of jaw
- Crimp or screw connection
- Jaws open 3/4" max

**Part Number 25C-RED**  
For clip with red insulator  
**Part Number 25C-BLK**  
For clip with black insulator
