Arctic Superflex Blue® Jumper Cables & Systems

Polar Wire’s custom and prebuilt Jumper Cables and Systems are made exclusively with Arctic Superflex Blue® cable for unmatched performance and durability. Our cables are ideal for auto, fleet or service applications and are proven in the most extreme environments and in sub-zero weather, staying flexible in temperatures of -55°C to 105°C.

Arctic Superflex Blue® Jumper Cables are fitted with solid copper, continuous duty 400 and 800 AMP cable clamps with heat shrink applied at the connections for additional strain relief and corrosion resistance.

- Ideal for automotive, fleet or service applications
- Proven in extreme temperature ranges of -67°F to 221°F (-55°C to 105°C)
- Resistant to the abuses of oil, gasoline, salt water, acids and chemicals
- Highly abrasion resistant
- Use in most 600 volt applications
- Built using UL/CSA Listed or Recognized components and processes
- LIFETIME WARRANTY on manufacturing and materials.

Applications
Available in 4, 2, and 1/0 AWG in various lengths and configurations:

4 AWG
- For most auto and marine uses
- Cars, pickups, diesels, and marine engines

2 AWG
- For heavy equipment
- Trucks, tractors, light planes, most commercial applications

1/0 AWG
- For extreme duty requirements
- Earth moving equipment, aircraft, extended distances

Configurations

Clamp to Clamp
- Provides high mobility and versatility

Harness to Clamp
- Ideal for utility vehicles

Harness to Harness
- For all fleet vehicles

THE VERY BEST jumper cables available!

Arctic Superflex Blue® jumper cables handle with exceptional ease, and won’t tangle or kink, even in extreme cold!

1/0 gauge cables 800 amp clamps

Arctic Superflex Blue® jumper cables include a rugged BucketBoss® zippered bag for easy storage. Durable Boss®Tex ripstop fabric. 13” diameter fits neatly in spare wheel.
## Clamp to Clamp Jumper Cables

### 4 Gauge Clamp to Clamp

<table>
<thead>
<tr>

</tbody>
</table>

- **Arctic Superflex Blue®** double conductor wire stays flexible and tangle free, even in extreme cold
- 4 and 2 gauge cables are fitted with 400 AMP continuous duty rated solid copper clamps; 1/0 gauge cables have 800 AMP clamps
- Heat shrink is applied at six points for strain relief and protection from dirt and corrosion
- Clamps are easily replaced
- Storage bag included

8 AWG configurations available for light duty applications

### 2 Gauge Clamp to Clamp

LIMITED
Harness to Clamp Jumper Cable Systems

- Modular design—quickly converts as needed with available extra clamp or harness modules
- Ideal for utility vehicles
  - Arctic Superflex Blue® double conductor wire stays flexible in extreme cold
- 4 and 2 gauge cables are fitted with 400 AMP continuous duty rated solid copper clamps, 1/0 guage cables have 800 AMP clamps
- Impact-resistant polycarbonate Lexan® power connectors are mated easily and lock securely
- 3/8” heavy duty copper eyelet lugs
- Heat shrink applied at ten points for strain relief and corrosion protection
- Clamps and power connectors are easily replaceable for lifetime use
- Storage bag included

Power Connectors
A. Single-piece Polycarbonate Lexan® housings are impact-resistant and feature high physical and dielectrical strength. Superior tolerance to extreme cold or heat.
B. Tempered 301 stainless steel connector springs maintain constant pressure to the contacts and resist vibration arcing.
C. Unique Ramplock action allows contacts to mate easily yet securely lock in position when the housings are connected.
D. Solid copper contacts are plated with 99.9% pure silver to ensure superior connection and maximum conductivity with low resistance. Contacts are securely crimped to cables and heat shrink applied for corrosion resistance.

4 Gauge Harness to Clamp
- 400 AMP copper clamps, 3/8” heavy duty eyelet lugs

2 Gauge Harness to Clamp
- 400 AMP copper clamps, 3/8” heavy duty eyelet lugs

1/0 Gauge Harness to Clamp
- 800 AMP copper clamps, 3/8” heavy duty eyelet lugs
Harness to Harness Jumper Cable Systems

**Cold weather RELIABLE— Keep your fleet ON THE ROAD!**

Modular system includes power cable and two harness modules. Add additional clamp or harness modules to your system for extra versatility.

- For all fleet vehicles
- **Arctic Superflex Blue** double conductor wire stays flexible in extreme cold
- Impact-resistant polycarbonate Lexan® power connectors are mated easily and lock securely
- 3/8” heavy duty copper lugs
- Heat shrink applied at 14 points for strain relief and protection from dirt and corrosion
- Built to industrial standards for a lifetime of performance

**Converter and Harness Modules**

**2’ Converter**
Readily convert your harness system as needed

- 4 Gauge Leads
- 400 AMP Clamps
- 175 AMP Connector
- Part Number: JC-4-2CLAMP

- 2 Gauge Leads
- 400 AMP Clamps
- 175 AMP Connector
- Part Number: JC-2-2CLAMP

- 1/0 Gauge Leads
- 800 AMP Clamps
- 350 AMP Connector
- Part Number: JC-1/0-2CLAMP

**4’ Harness**

- 4 Gauge Leads
- 175 AMP Connector
- 3/8” Heavy Duty Lugs
- Part Number: JC-4-4D

- 2 Gauge Leads
- 175 AMP Connector
- 3/8” Heavy Duty Lugs
- Part Number: JC-2-4D

- 1/0 Gauge Leads
- 350 AMP Connector
- 3/8” Heavy Duty Lugs
- Part Number: JC-1/0-4D

All styles available in 8 AWG configurations for light duty applications
