**Arctic Ultraflex Blue®**

*Arctic Ultraflex Blue®* continues to be the premier arctic grade wire rated and proven to work in extreme temperature ranges of -55°C to 105°C. This highly flexible wire combines finely stranded copper construction with a durable jacket material that resists the abuses of oil and gasoline, sunlight, saltwater, acids, and chemicals.

*Arctic Ultraflex Blue®* is highly abrasion resistant and can be used in most 600 VOLT applications. UL Listed as AWM (Appliance Wiring Material).

*Arctic Ultraflex Blue®* has numerous applications, including those approved under NEC article 400 and associated articles.

**Applications**
- UL 508A Industrial control panels
- Internal appliance and equipment wiring
- Inverter cables and wiring
- Industrial machines and robotics
- Construction equipment, forklifts, golf carts
- Marine, RV and automotive wiring
- Medium and heavy-duty trucks and trailers
- Load banks, motor leads, welding cable
- Batteries and chargers
- Power hookup cable

---

American Wire gauge (AWG) is a standard for the size of electric wires. The smaller the gauge number, the thicker the wire.

The Insulation Thickness is given in inches and represents the thickness of the insulation material. The Minimum Finished Outside Diameter is also given in inches, representing the smallest diameter that the wire can be after the insulation has been applied.

The Ampacity is the maximum amount of current that the wire can carry without exceeding its rated temperature. The ampacities are given for 30°C (86°F) and 40°C (104°F) ambient temperatures.

The Oxygen Index is a measure of a material's resistance to combustion. A higher Oxygen Index indicates better flame retardant properties.

The Oil Aged and Air Aged tests measure how the insulation retains its strength after exposure to oil and air, respectively. Retention of Tensiles and Elongation are expressed as a percentage of the original values.

The VW-1 Flame Test is a test to determine if a material will support a flame. UL Standard Pass indicates that the material passes the test.

The Voltage Rating indicates the maximum voltage at which the wire can be used.

---

*Note: Ampacities of 600V and 1000V 105°C AWM wires in air. Ampacities based on single conductor in free air, 30°C (86°F) or 40°C (104°F) ambient temperature as specified. 105°C (221°F) conductor temperature, per table 310-17 of the NEC (adjusted for 105°C). Free air ratings assume a one-cable diameter spacing between adjacent conductors.*
100% copper flexible fine strand conductors are tinned for corrosion resistance and conductivity

- Ultraflexible, highly abrasion resistant jacket withstands water, salt, oil and gas, chemicals, sunlight

- Tested and proven in the harsh environment of Alaska’s Arctic North Slope

-55°C TO 105°C

Large spools and bulk quantities available

Arctic Ultraflex Blue®
Power Cord

Features
- Flexible, tough jacket
- Works under temperature extremes of -50°C to 105°C
- Color coded conductors for easy identification
- Excellent abrasion and cut resistance
- Ozone, sunlight, and water resistant with high dielectric insulation
- Water and mold resistant non-wicking polypropylene fillers
- Lightweight, long lasting, easy to carry and handle
- All components are recyclable and non-hazardous for environmental landfill disposal

Applications
- Special uses requiring flexibility and mechanical toughness, high environmental resistance and flame retardance
- Pendant push button remote controls
- Motor control, stage equipment and lighting
- Industrial control and robotic systems
- Machine and power tools
- Portable power
- Dockside power applications
- Mining and outdoor applications
- Suitable and approved for submersion in water

Industry Approvals
- Federal and Military use under Federal Spec. JC-580B
- UL Listed SEOOW 600V and SJEOOW 300V for NEC Article 400
- CSA Certified STOOW or SJTOOW (TPE) -50°C to 105°C
- MSHA approval for flame resistance and mining applications

*Note: Sizes 8/2 up to 2/5 are non-UL constructions made with wall thicknesses in accordance with industry standards and MSHA Approved.

### Features
- Flexible, tough jacket
- Works well in temperature extremes of -70°C to 105°C
- Color coded conductors for easy identification
- Excellent abrasion and cut resistance
- Ozone, sunlight, and water resistant with high dielectric insulation
- Water and mold resistant non-wicking polypropylene fillers
- Lightweight, long lasting, easy to carry and handle
- All components are recyclable and non-hazardous for environmental landfill disposal

### Applications
- Uses requiring flexibility and mechanical toughness, high environmental resistance and flame retardence
- Suitable and approved for submersion in water
- On and offshore drilling
- Construction, industry, research
- Mining and outdoor applications
- Dockside power applications
- Industrial control and robotic systems and equipment
- Motor control, lighting, push button remote controls
- Machine and power tools
- Portable power, mobile power
- Extreme power cording

### Industry Approvals
- Federal and Military use under Federal Spec. JC-580B
- Manufactured to UL SEOW 600V and CSA Certified STOOW (TPE) standards
- MSHA approval for flame resistance and mining applications

Arctic Ultraflex Blue®

Tough, durable Polar Wire Extension Cords are designed for ease of handling and superior performance in cold weather applications. The SEOW-designated Arctic Ultraflex Blue® jacket remains flexible to -50°C and won't become stiff or crack, even in extreme temperatures. Arctic Ultraflex Blue® has excellent abrasion resistance and withstands oils, greases, gas, salt, sunlight, and chemicals. Clear NEMA 5-15 strain relief molded ends light to provide instant power verification. Polar Wire extension cords are available in a variety of length and gauge configurations, or specify custom sizes and colors to suit your needs.

• **Our rugged cords OUTPERFORM and OUTLAST the imitators**
• **Proven dependable in the worst winter conditions**
• **Industrial grade, contractor quality**
• **Heavy duty molded-in blades fit tightly so water won’t penetrate**
• **Arctic Ultraflex Blue® cords are exceptionally easy to handle and won’t tangle or kink**

**Features**
- Superior flexibility to -50°C (-58°F)
- Class K fine stranded copper construction
- Resists oil, grease, chemicals, abrasion
- Sunlight and weather resistant
- Lights when energized
- Clear NEMA 5-15 molded ends
- Flame retardant (VW-1)
- Heavy duty strain relief
- Reinforced blades and pins
- UL and CSA Approved
- Environmentally safe
- Made in the USA

**Designed for unbeatable performance in even the most extreme conditions**
Arctic Ultraflex Blue® is used extensively on Alaska’s Arctic North Slope

Multi-Conductor Boat Cable

Round and Flat Triplex Boat Cable

Polar Wire’s exclusive UL Listed premium multi-conductor Boat Cable is designed for outstanding performance and corrosion protection in harsh marine environments. 100% copper Class K stranding provides exceptional flexibility, eases installation and reduces fatigue from vibration and flexing.

Features
- UL listed Tinned Copper Boat Cable
- 10, 12, 14, and 16 AWG Triplex with black, white, and green conductor colors
- 6, 8, 10, 12, 14, 16, and 18 AWG DC Duplex with red/black or red/yellow conductors
- Ultra-flexible Class K fine stranding
- Tinned for protection against corrosion and electrolysis
- Designed specifically for easier handling and installation in cramped spaces
- Opt for round cable for best all-direction bending ability, or choose the space saving flat profile for tight spaces and stacking
- Flat profile is constructed without fillers to facilitate jacket removal and wire stripping
- Resists saltwater, oil and gasoline, heat, sunlight, abrasion
- 600 volts up to 221°F (105°C) dry, 167°F (75°C) wet
- Flexible in cold conditions
- Manufactured by Polar Wire in the USA

Marine grade Triplex Boat Cable is configured in round and flat profiles with black, white, and green conductors and white TPE outer jacket. 100% copper Class K fine stranded conductors are ultra flexible and tinned for maximum corrosion resistance and long performance. Construction meets and exceeds UL1246, CSA, and ABYC standards.

Rated for 600 volts, 105°C dry, 75°C wet. Durable jackets resist salt water, oil, gas, sunlight, heat, and abrasion.

Round and Flat DC Duplex Boat Cable

Marine grade DC Duplex Boat Cable is constructed with 100% copper ultra flexible Class K fine stranding, tinned for maximum corrosion resistance and long performance. DC Duplex is configured in flat and round profiles with ABYC recommended red insulated (DC positive) and yellow insulated (DC negative) conductors, or in flat profile with red and black conductors. White TPE outer jacket. Construction meets and exceeds UL1246, CSA, and ABYC standards.

Rated 600 volts, 105°C dry, 75°C wet. Resists vibration and flexing fatigue, oil, gas, salt water, sun, heat, and abrasion. Manufactured in the USA by Polar Wire.

Typical Legend
POLAR WIRE BOAT CABLE E321438 (UL) 8 AWG 2/COND VW-1 600V 105C DRY 75C WET OIL RESISTANT BC5W2 MADE IN USA RoHS COMPLIANT — CSA TEW 105C OR AWM I A/B 105C 600V FT1 265576
**Arctic Ultraflex Blue® Twin Trailer Cable**

*Arctic Ultraflex Blue® Trailer Cable* is manufactured exclusively by Polar Wire Products using our arctic grade jacket material that is ultra flexible, lightweight, abrasion resistant and chemical, oil, gas and water resistant. Conductors are Class K fine stranded 100% copper, tinned for corrosion resistance. Designed to perform in extreme cold weather, Polar Wire Trailer Cable stays flexible in extreme temperatures of -55° to 105°C.

*Arctic Ultraflex Blue® Twin Trailer Cable* features red and black tinned conductors and is available in sizes 18 through 10 AWG.

### Features
- Finely stranded 100% Copper
- Tinned for corrosion resistance
- Flexible to -55°C (-67°F)
- 600 Volt rated
- Industry standard colors
- Exceeds SAE standards
- Resists acids, chemicals, oil, gas, sunlight, salt, water

### Applications
- Trailer wiring
- DC power needs
- Solar panel and tracker wiring
- Renewable energy projects
- Robotics and related equipment

### Typical Legend
ARCTIC ULTRAFLEX 14 AWG POWER & CONTROL TRAY CABLE TYPE TC 600V SUN RES

### Twin Trailer Gray outer jacket

PROUDLY MADE IN THE USA
-55°C TO 105°C
Arctic Ultraflex Blue® Multi-Conductor Trailer Cable

Arctic Ultraflex Blue® Multi-Conductor Trailer Cable is made with 100% copper conductors in 4 and 7 conductor configurations. Class K fine stranded conductors are tinned to resist corrosion (AUF-TC101214-7 is bare copper).

Multi-Conductor Trailer Cable is designed for superior flexibility and long performance in extreme temperatures of -55° to 105°C. 600 Volts. Available by the foot.

Features
- Finely stranded 100% Copper
- Tinned (except AUF-TC1014-7)
- Flexible to -55°C (-67°F)
- Industry standard colors
- Exceeds SAE standards
- Resists acids, chemicals, oil and gas, sunlight, salt, water

Applications
- Trailer wiring, DC power needs
- Solar panel and tracker wiring
- Renewable energy projects
- Robotics and related equipment
